## **From Colonial Colleges to Land-Grant Universities**

The first colleges in America were founded in the 17th century by religious denominations. These early colleges were primarily focused on training ministers, but they gradually expanded their curricula to include other subjects such as law, medicine, and the arts. By the 19th century, colleges and universities had become more secular and began to play a more prominent role in American life.

One of the most significant developments in the history of American higher education was the establishment of land-grant universities. The Morrill Act of 1862 granted federal land to states for the purpose of establishing colleges that would focus on agriculture and mechanical arts. These land-grant universities played a vital role in the development of the American

economy and helped to make higher education more accessible to students from all backgrounds.
