A Historical Perspective: The Genesis of the OECD

The OECD's origins can be traced back to the post-World War II era. In 1948, 18 European nations established the Organisation for European Economic Cooperation (OEEC) to coordinate economic recovery efforts and administer Marshall Plan aid.

As Europe regained stability, the OEEC's mandate evolved. In 1961, it became the OECD, expanding its membership to include non-European countries and broadening its focus to include a wider range of economic and social issues.

Mission and Objectives: Guiding Principles of the OECD

The OECD's mission is to promote economic growth, employment, and living standards while fostering sustainable development and global well-being. Its core objectives include:
