The Five Hidden Habits

1. Confirmation Bias: Seeking Information that Aligns with Existing Beliefs

This habit leads teens to prioritize information that confirms their pre-existing views, while dismissing or ignoring evidence that challenges them. The book offers strategies to encourage critical thinking, foster open-mindedness, and promote the ability to consider multiple perspectives.

2. In-Group Bias: Favoring Those Perceived as Similar

Teens may unconsciously favor people who share their backgrounds, interests, or social circles. The book explores the importance of recognizing and mitigating this bias, promoting empathy and inclusivity towards diverse groups online.

3. Imposter Syndrome: Doubting Own Abilities Despite Evidence

This hidden habit often affects teens from marginalized groups, who may feel a sense of inadequacy or doubt despite their accomplishments. The book empowers teens to build confidence, celebrate their unique perspectives, and challenge the negative self-talk that may hinder their online engagement.

4. Echo Chambers: Limited Exposure to Diverse Viewpoints

Teens who spend excessive time on platforms that primarily reflect their own beliefs can create echo chambers, limiting their exposure to alternative perspectives. The book guides teens in seeking diverse sources of information, engaging in respectful debates, and fostering a healthy intellectual curiosity.

5. Algorithmic Bias: Personalized Content that Reinforces Biases

Social media algorithms often personalize content based on past interactions, which can inadvertently reinforce existing biases. The book

educates teens about algorithmic bias, empowering them to critically evaluate the information they encounter online and seek out diverse perspectives.
